- Accessible by login node
- 10,000 file limit

Data Sharing: Within RC

Data Sharing: Outside RC

Tools for data transfers:

- Globus (Recommended)
- Terminal/Command Line:
 - rsync
 - rclone
 - sftp
 - scp

Data Transfer Nodes

DATA (DTN)

- Support data transfers
- Can be selected when using scp, sftp, or ssh transfers
- *dtn.rc.colorado.edu*

Acceptable data storage and use

CURC systems and services **should not be used to store** any data that is US government Classified, nor any Controlled Unclassified Information.

For users requiring storage for sensitive data types, please see the secure research computing resources:

<https://www.colorado.edu/rc/secure-research-computing-resources>

Cloud Computing

- CURC supports AWS, Azure, and GCP
- Alternative or augmentation to HPC
- Interested? Contact rc-help@colorado.edu

How to Access RC Resources?

1. Get an RC account
2. Set up two-factor authentication with Duo
3. Log in via 1) *terminal* or 2) *OnDemand*
4. Create greatness! (responsibly)

Getting an Account

- CU Boulder, CSU users and affiliates:
 - Request an account through the RC Account request portal:
<https://rcamp.rc.colorado.edu/accounts/account-request/create/organization>
- AMC, RMACC users and affiliates:
 - Visit the *AMC* or *RMACC* tab under “Getting a CURC account” in the CURC documentation:
https://curc.readthedocs.io/en/latest/getting_started/logging-in.html

Your RC Account

Access to:

1. Alpine Cluster
2. Core Storage
3. PetaLibrary Storage*
4. OnDemand
5. Approximately 2,000 Service Units (SUs) per month

**If purchased*

Duo Authentication

1. Duo smartphone app (recommended)
2. Phone Call/Text is an alternatives

Terminal Access

- Mac or Linux
 - Terminal application
- Windows
 - PuTTY
 - Powershell

```
[user0083@tlogin1 ~]$ pwd  
/home/user0083  
[user0083@tlogin1 ~]$
```

Demo: Logging in via Terminal

To login to an RC login node^{*} :

```
$ ssh <username>@login.rc.colorado.edu
```

Supply your institutional password and your Duo app will alert you to confirm the login

^{*} *Exclusive to CU and CSU accounts. Available on request for AMC. Not available to RMACC.*

Demo: logging in with OnDemand

CURC OnDemand is a browser based, integrated, single access point for all of your HPC resources at CU Research Computing.

- CU Boulder: Visit <https://ondemand.rc.colorado.edu>.
- All other Institutions: Visit <https://ondemand-rmacc.rc.colorado.edu/>

Help! I'm stuck, where do I go?

- **Consult Hours** (Tuesday 12:00-1:00 in-person or virtually, Thursday 1:00-2:00 virtually)
- Or....

...try CURC's new self-paced training!

Research Computing New User Training

Welcome to the Research Computing New User Training! This course covers the ins and outs of CU Research Computing's (CURC) High Performance Computing (HPC) systems.

Please enter your Research Computing account information:

Do you have an existing RC account?

Institutional email address:

Note: Multiple questions are embedded in this training. It is ok if you don't know the answer to every question! Many of the questions are designed to test for common misconceptions and help you avoid common pitfalls for new users.

Helpdesk Tickets

To: rc-help@colorado.edu

Dear Research Computing,

Help! My code won't run!
Help!

Help please,
John

To: rc-help@colorado.edu

Dear Research Computing,

I am running into issues running my Python script. I am using a conda environment called `my_python_env` with the pytorch software, and I am receiving the following error. I am not sure how to troubleshoot. My job ID is 620350. Let me know what I can try!

`sbatch: error: Batch job submission failed: Invalid partition name specified.`

Thanks,
John
